They/Them Siri Shortcut Documentation

A quick utility to demonstrate use of They/Them pronouns.

[**GitHub Documentation**](https://github.com/extratone/i/issues/113)

***

About

This shortcut was created for the next time you encounter the sentence "it just doesn't sound right," or variations, regarding they/them pronouns. It opens [prounouns.is' handy explainer](http://pronoun.is/they/.../themselves) in Safari, copies the URL to the clipboard, and then plays an audio clip of Siri Voice 3 reading aloud said webpage's examples.

I personally have the shortcut named "they" so I can use type-to-siri's CLI-ish function *or* simply "Hey Siri!... They."
